Projects

masterDex - [Source](#)

Ruby, Rails, PostgreSQL

- A web application that allows a League of Legend players to look up theirs or another players Ranked Champions.
- Once the Ranked Champions are loaded, the player or summoner is allowed to click on the champions that are highlighted in the Ranked section.
- After the specific champion is clicked, the app then redirects to a page graphing their very first ranked match to their lastest ranked match displaying the selected champions progression using a grading algorithm based off their stats for each match.

Bright Ideas - [Source](#)

Ruby, Rails, SQLite

- Web app that allows users to post a Bright Idea to other users to see. Has the option to like the bright idea that was posted. Created database with controllers and models for a fully functional app within 4.5 hours for the Ruby on Rails belt exam.

Education

Coding Dojo - November 2015

Full Stack Web Development Program

- Completed intensive 14 week web development course, that includes Ruby on Rails, Python, and Full MEAN.
- While attending I accomplished highest level of achievement which was the Black Belt exam.

Modesto Junior College - Modesto, CA - 2012 - 2014

- Left with (3.0 GPA) to pursue greater opportunities in web development
-

Experience

Men's Wearhouse - Modesto, CA - Sept 2011 - Sept 2015

- Worked as a Wardrobe Consultant to pay my way through school
- Carefully interviewed customers which allowed me to show products that fit their everyday lifestyle and needs
- Strong selling techniques; reflected by personal statistics that were well above company wide averages
